STRONGER
CHOICE

ABOUT PRODUCT

Our innovative design makes this versatile tool your go-to equipment when you need to get the job done right, the first time around. Its durable and sleek form will easily clear surfaces of any loose material. Unlike traditional scrapers and shovels, its unique ergonomic design utilizes your body's strength to do the work. There is no heavy lifting or potential injury to your back. PushAll™ allows you to move more with less effort. Every year there are thousands of snow shoveling-related injuries reported. The majority of those injuries are to the lower back, and injuries to the arms and hands. It's the perfect alternative to shovels and scrapers for easily clearing loose materials.

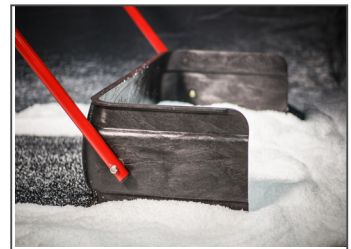

UNIQUE DESIGN

- Equivalent to a 48" standard shovel or scraper
- Holds up to 2300 cubic inches of material per pass — saving you time and energy
- Loose materials won't fall off the blade edge like traditional straightedge shovels and scrapers
- Easily glides over cracks and seams in cement, decks, pavers, and other uneven surfaces
- Replaceable blade made of recycled, nearly indestructible high-density polyethylene
- Safe for wood and composite decks
- Patent pending

ERGONOMIC FORM

- Handle automatically adjusts to your height and push angle, reducing back strain
- Wide U-handle evenly distributes weight to both arms, allowing you to push more with less effort, unlike traditional single-shaft handles
- Dual use for both pushing and pulling
- Insulated, shock-absorbing grips won't get cold or slippery, even in the harshest of conditions
- Powder-coated steel handle and high-density polyethylene blade are corrosion resistant
- Stand, fold, or hang up for easy storage
- Light-weight and easy to use, only 8 lbs!
- 1-year limited warranty

JOB USE

- Snow removal
- Clearing livestock feed and waste
- Cleanup of industrial scrap
- Move sand, dirt, pea gravel, wood chips, grain, shavings, and more
